## 16.06 Picture Lab Worksheet

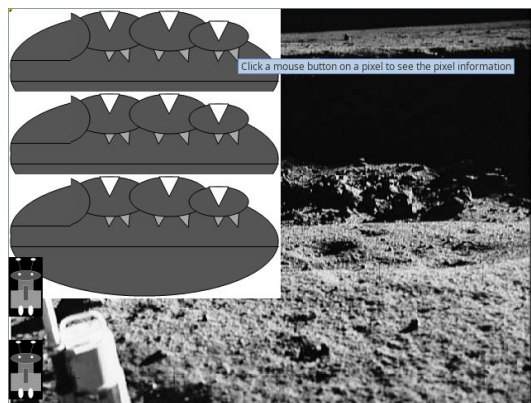

**Directions:** Make note of your responses to the following questions as you work through the activities and exercise in the lesson.

### Activity 8 Exercise Results

1. Paste the image that is the result of calling the second copy method that adds parameters to allow you to copy just part of the fromPic.

2. Paste the image that is the result of calling the myCollage method.

## Activity 9 Exercise Results

1. Paste the image that is the result of calling the `edgeDetection2` method.

2. Think about and propose another algorithm for edge detection.

For another edge-detection algorithm, I would most likely use the same concept of using color distances but use a diagonal traversal of the picture along with the already performed vertical and horizontal traversals.
